Yard Light Hoods - **\$50.00** ea. plus tax (\$125.00 + tax installed)

Before

After

Yard light hoods may be purchased for your personal yard light at \$50.00 each plus tax. **VEC will install a yard light hood for \$75.00 plus tax on any VEC maintained yard light (\$125.00 plus tax total price).**

The yard light hood provides safety illumination without producing upward light pollution. The reflector produces a wide distribution of light for maximum coverage and redirects wasted upward spill-light back onto the area to be illuminated increasing light levels as much as 95% versus refractor style lights.

The hood is made of die-cast aluminum, which is lightweight, durable and weather resistant. It meets EEI-NEMA standards. The hood has high reflectance, exclusive ANODAL® finish and latch-on optics for ease of installation. It will fit all true NEMA head units for quick upgrade of existing yard lights.
